September 3, 2008

Dear Boris,

I would like to thank you for putting on a highly entertaining and fun show for our staff this summer. The doctors, nurses, administrators, allied health professionals, volunteers and even patients and their families had a hilarious time experiencing the Incredible Boris. While our routine tends to be one of immense seriousness coupled with constant concern for the well-being of our patients, you helped to relieve some of the stress and lighten the load if just for an hour or so. Your talent is admired by many and you have proved that hypnotism is a form of healing as much as it is entertaining.

Our colleagues are still talking about the 'unbelievable' experience and are looking forward to your return.

Again, "Let it sink in", many thanks.
